

Play and Socialization

It is widely known and accepted that children learn best through play. They build social skills and absorb information about the world and how it works through play. At My Village, play is a priority and scheduled into each day.

As homeschoolers, we need to be intentional on providing socialization opportunities for our children. My Village is a great place for socialization because we incorporate free time each day for children to connect. Also, having a place where our children can see their friends on a weekly basis helps to build relationships. To help foster family friendships, we schedule meet-ups and field trips. Many of our families are now close friends and some even carpool to My Village.
