

At My Village Learning Center, we understand that many homeschooling families want additional support with core academics. Our **Small Group Academic Support program using Miacademy** provides students with structured time during the school day to work on **Language Arts or Math** in a focused and encouraging learning environment.

Students enrolled in this option will be **pulled from select classes during the academic day** to work on their Miacademy coursework with the guidance of an experienced teacher.

This program combines the flexibility of homeschooling with the accountability and support of a small-group classroom setting.

A Supportive Academic Environment

During Small Group Academic Support sessions, students receive:

- A **quiet, structured workspace** for focused learning
- **Teacher supervision and encouragement** to stay motivated and on task
- Help navigating lessons and **answers to questions when students need support**
- **Manipulatives, worksheets, and additional materials** to reinforce concepts
- Access to **computers while on campus**

Students work through the Miacademy curriculum at their own pace while benefiting from the structure and support of a classroom environment.

Partnership with Parents

My Village Learning Center operates as a **hybrid homeschool program**, meaning parents remain the **primary educators** for their children.

Our role is to support your homeschool by providing:

- Guided work time during the school day
- Academic support and encouragement

- Communication when students need additional help

Parents will receive **login access to the Miacademy parent portal** so they can easily monitor lesson completion, grades, and overall progress.

Because Miacademy is an online curriculum, students should also have **access to a computer at home**, and parents are encouraged to **sit with their child when completing lessons outside of MVLC hours**.

Parents will also provide **a pair of headphones for their child to keep at MVLC** for use during online lessons.

Monitoring Progress

Student grades and academic progress are **generated directly through the Miacademy platform** based on lesson completion, quizzes, and assessments.

MVLC teachers supervise students, help answer questions, and encourage progress during class sessions while parents can track performance through the Miacademy parent portal.

A Great Fit for Families Who Want

- Extra **accountability for core academics**
- **Structured academic time** during the school day
- Support from an **experienced teacher**
- A program that **complements your homeschool rather than replacing it**

Small Group Academic Support is designed to strengthen the homeschool partnership while helping students stay on track and build confidence in their learning.
